Flowering Shrubs give you a changing landscape as you can get in no other way. By the proper selection, on a somewhat extensive planting, you can have something in bloom or berry the year round. While it is true that most of the shrubs bloom in the spring, yet others do bloom later, and these with the ones that hold their berries into the winter, prolongs the season of outdoor interest. You will see that the blooming time of most of these plants is shown in the above descriptions.

The grape vines you shipped to my order arrived to-day in good condition. Thanking you for your kind interest.

T. Auestad,
Seattle, Wash.

Our red-clay soil here is particularly well suited to the growing of both coniferous and broad-leaf evergreens, and it sticks together well so that our balled plants carry much better than from sandy soils; our men know how to dig and ball, so that these plants will reach you in good condition.

IT PAYS TO PLANT A PLACE!

Our Landscape Department can help you do it just right.
